1. Login Page

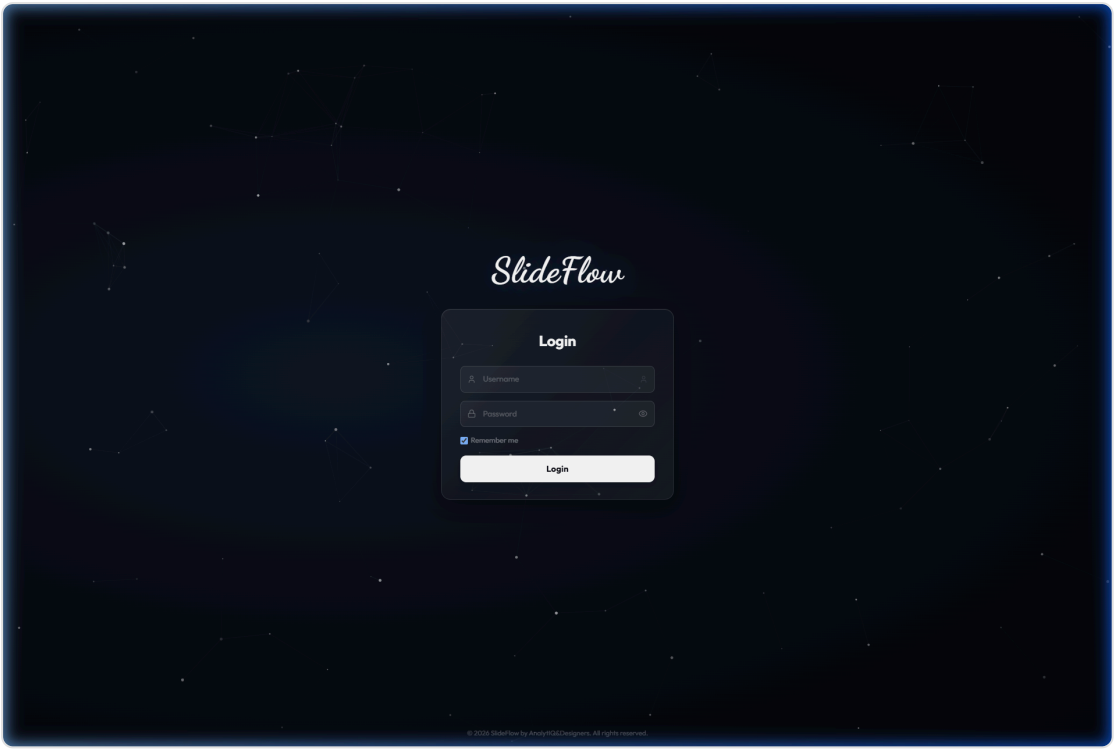
The login page is the entry point to SlideFlow. After the cursive intro animation, you are redirected here to authenticate.



SlideFlow Brand Title

The animated cursive "SlideFlow" logo displayed above the login card. This is the branding for the application and is not interactive.

Username Field

Enter your assigned username here. The field includes a user icon indicator on the left side.

Password Field

Enter your password here. The field includes a lock icon on the left and an eye/toggle icon on the right.

- **Eye Icon (👁)**: Click to toggle password visibility between hidden (dots) and visible (plain text).

Remember Me Checkbox

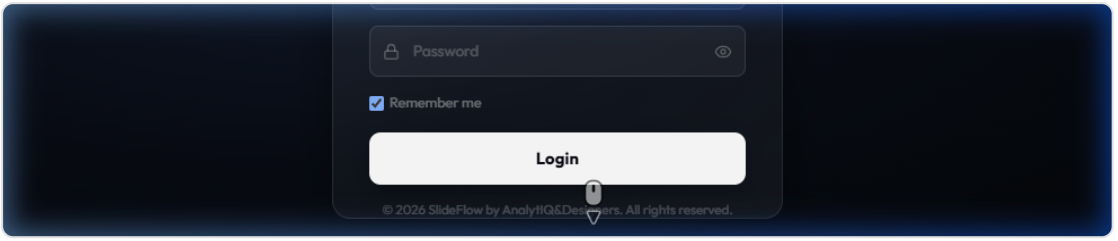
Check this to save your login session so you don't have to re-enter credentials on your next visit.

Login Button

Click to submit your credentials and access the dashboard. The button displays "Signing in..." while authenticating. If credentials are invalid, a red error message appears above the button.

Copyright Footer

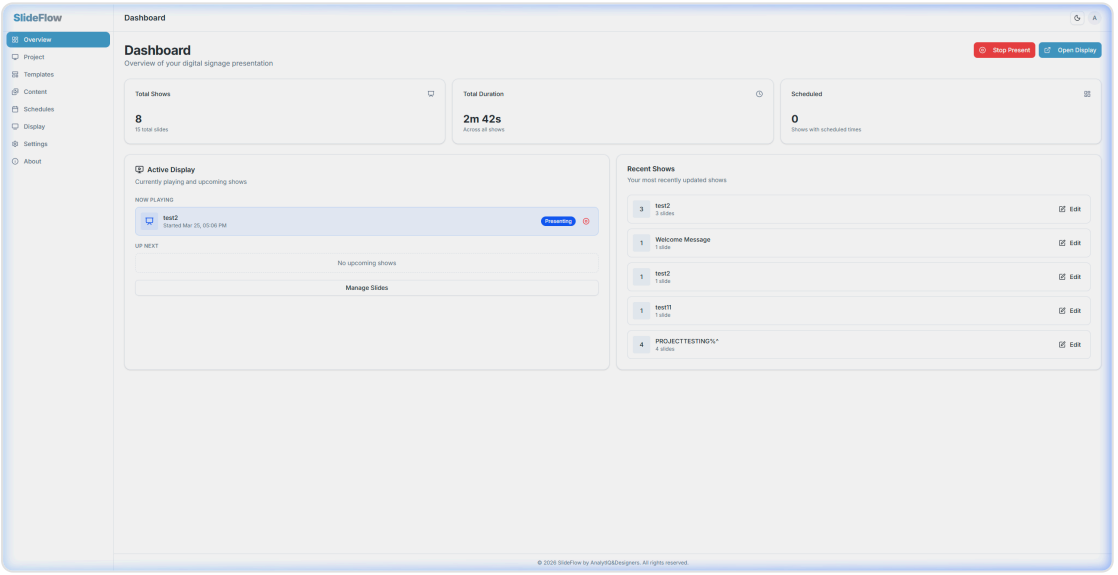
Displays the copyright notice and branding attribution at the bottom of the page.



---

2. Dashboard Overview

The main overview page showing statistics, active presentations, and recent shows at a glance.

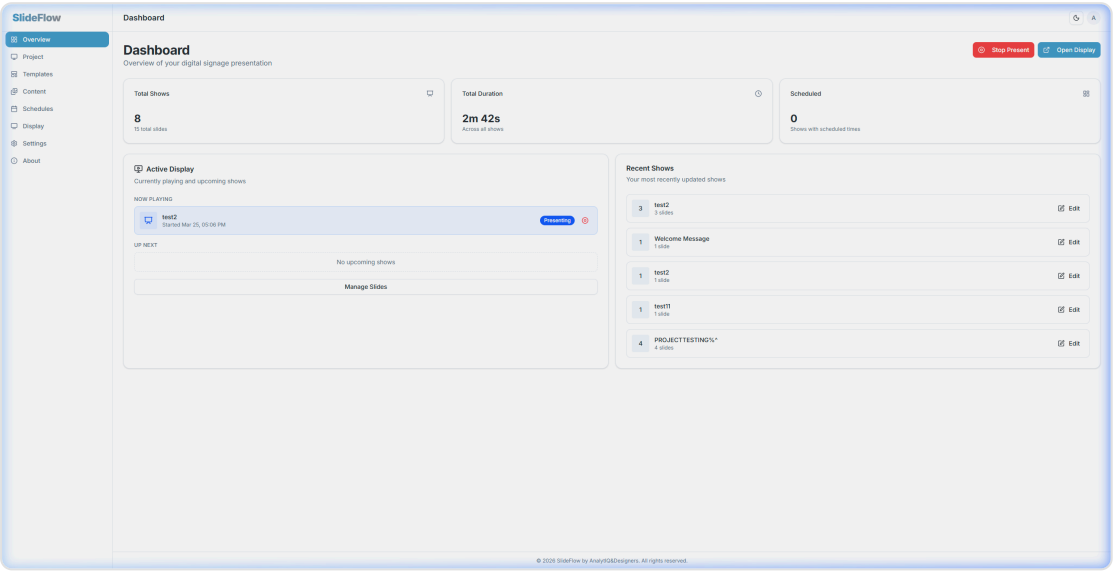


Stat Cards

Quick-view statistics showing key metrics about your digital signage content:

Total Shows — Displays the total number of shows/presentations created.

Total Duration — Shows the combined duration of all slides across all projects.



Stop Present Button

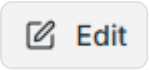
Stops the currently active presentation that is being displayed on screens.

Manage Slides Button

Quickly navigate to the editor for the currently active project to edit its slides.

Edit Show Button

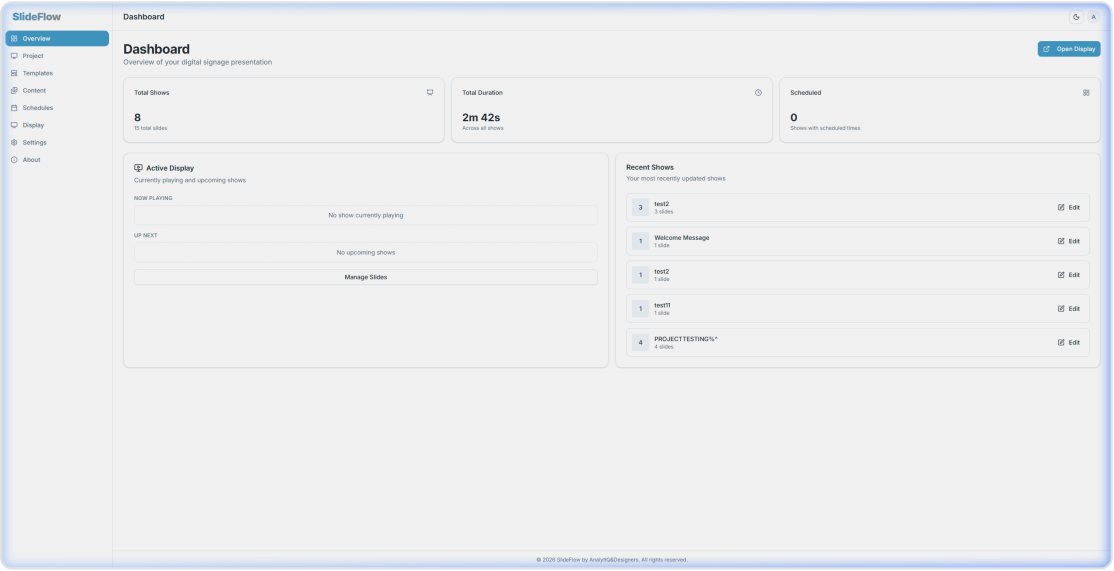
Opens the configuration for a recent show, allowing you to modify its slides, scheduling, and display settings.



---

3. Sidebar Navigation

The left sidebar provides quick access to all major sections of the application.

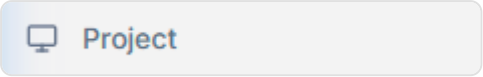


Overview (Dashboard)

Navigates to the main Dashboard overview page showing stats and active presentations.

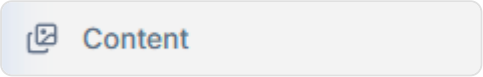
Project

Navigates to the Projects page where you create and manage your slide projects.



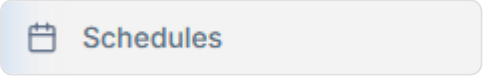
Content

Navigates to the Content Library where you upload and manage media assets (images, videos).



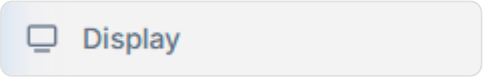
Schedules

Navigates to the Schedules page where you set up timed presentations for your displays.



Display

Navigates to the Display management page for configuring connected screens.



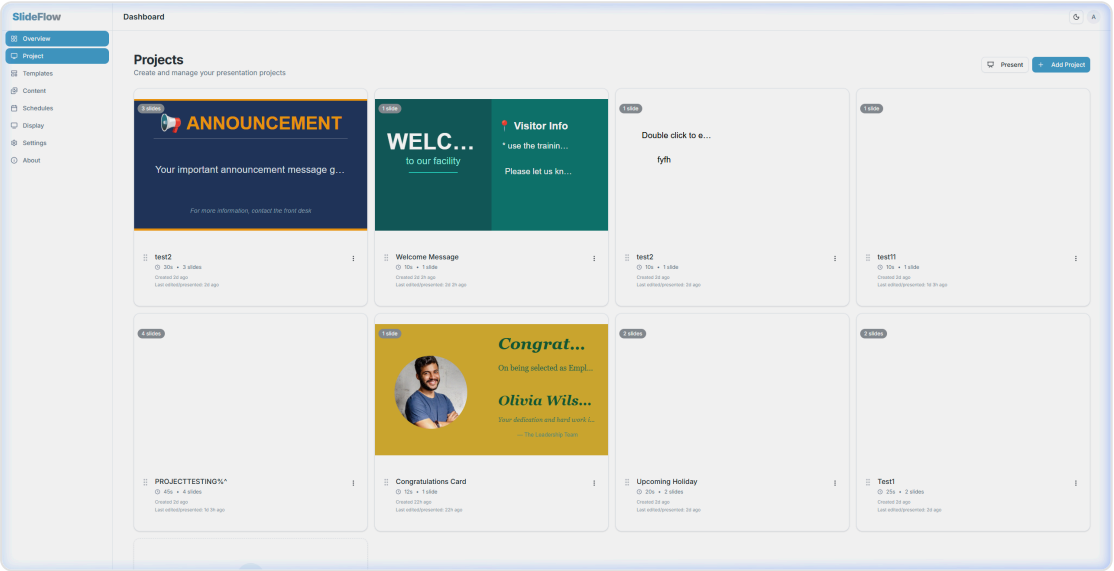
User Profile / Theme Toggle

Located in the top-right area of the header. Shows the logged-in user, and provides a theme toggle button to switch between light and dark modes.

A

4. Projects Page

The Projects page displays all your slide show projects in a card grid layout.



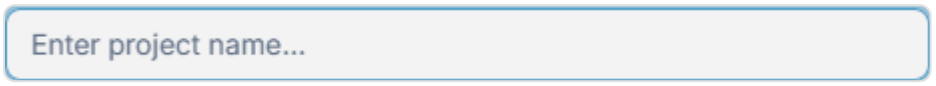
Add Project Button

Click to open the "Create New Project" dialog. Located in the top-right corner of the page.

Create New Project Dialog

A modal dialog that appears when you click "Add Project":

- **Project Name Field**: Enter a unique name for your new project. An error appears if a project with the same name already exists (case-insensitive).
- **Create & Edit Button**: Creates the project and immediately opens it in the slide editor.



Project Card

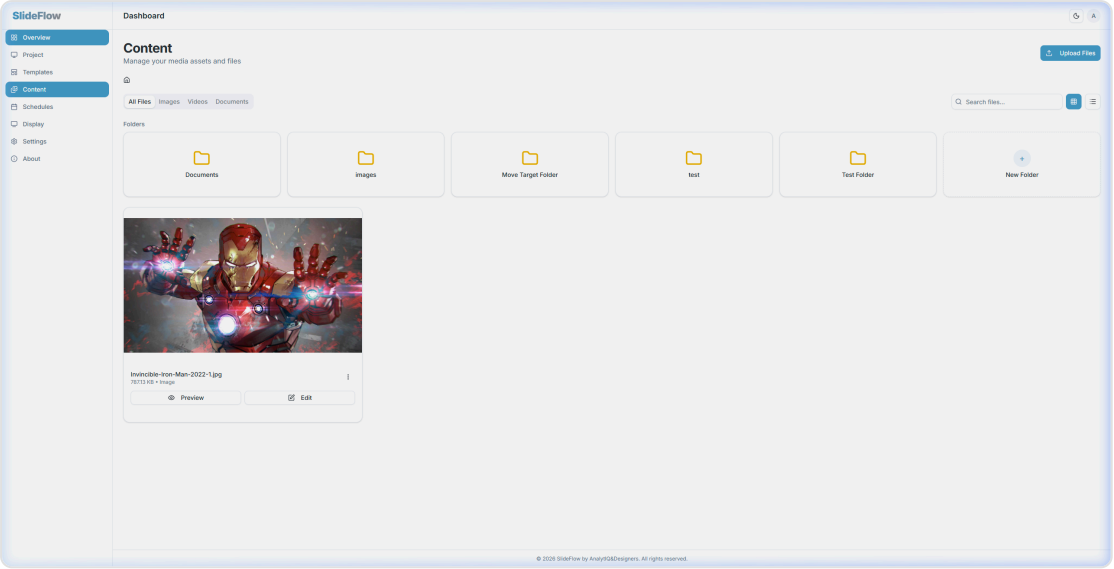
Each project is displayed as a card showing:

- **Project Preview**: A thumbnail of the first slide
- **Project Name**: The name you gave the project
- **Slide Count**: How many slides are in the project
- **Timestamps**: When the project was created and last modified
- **Edit Button**: Click to open the project in the slide editor
- **Delete Button**: Remove the project permanently

---

5. Content Library

The Content Library manages all uploaded media assets that can be used across your projects.

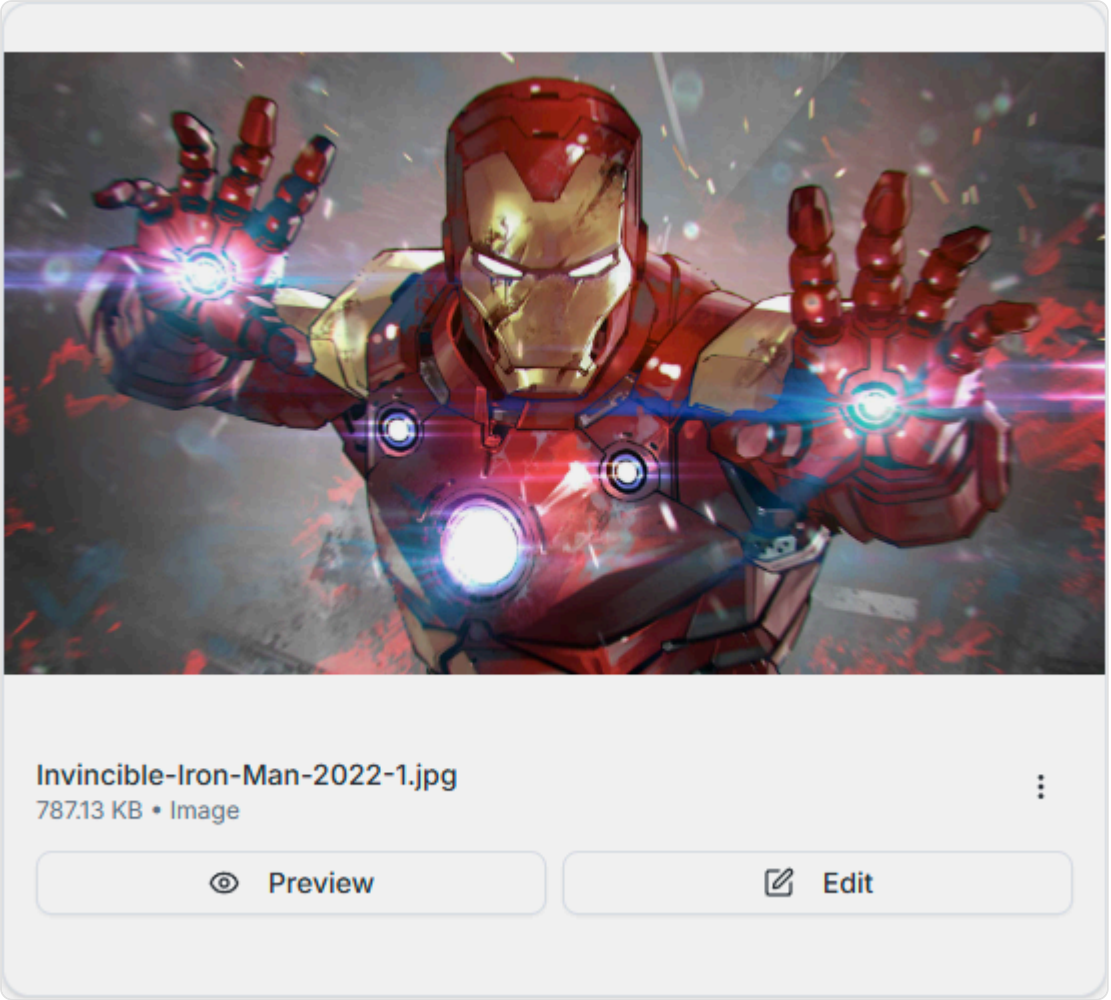


Upload Button

Click to upload new images or video files to the content library. Uploaded assets become available across all projects.

Content Item Card

Displays a preview of each uploaded asset with its filename and file type. Click to select or manage the asset.



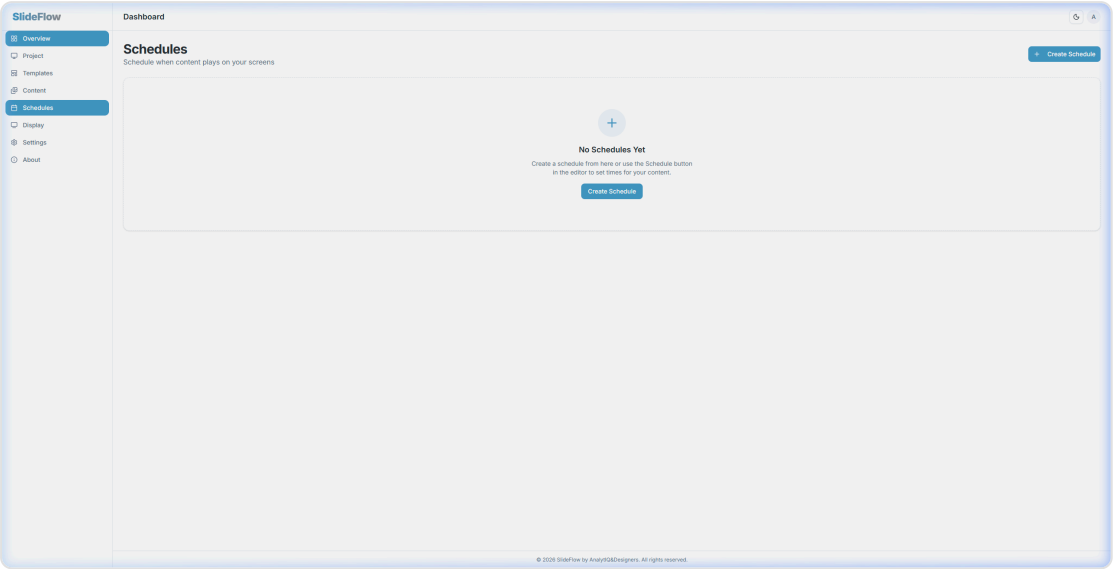
Search & Filter Controls

Use the search bar to find assets by name, and filter by file type (images, videos, etc.) to quickly locate specific media.

---

6. Schedules Page

The Schedules page lets you create timed presentations that automatically display on connected screens at specific times and dates.

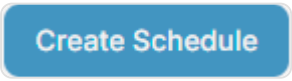


Create Schedule Button (Header)

Click to create a new schedule. Located in the top-right corner of the page.

Create Schedule Button (Empty State)

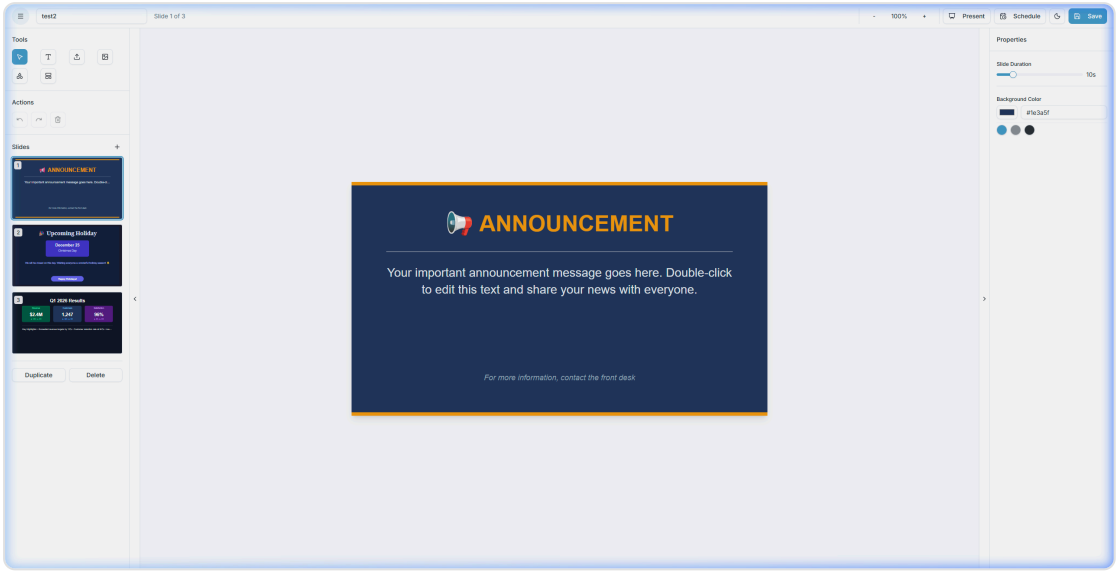
When no schedules exist, a prominent button is displayed in the center of the page encouraging you to create your first schedule.



---

7. Slide Editor

The editor is the core workspace where you design individual slides for your digital signage presentations.



7.1 Editor Toolbar

Located on the left side of the editor. These tools control what you can add or manipulate on the canvas.

Cursor / Select Tool

Default tool. Click to select, move, drag, and resize elements on the canvas. When active, clicking any element highlights it with resize handles.

Text Tool (T)

Adds a new text box to the current slide. After clicking, a text element is placed on the canvas that you can double-click to edit. Use the Properties panel to change font, size, color, alignment, and weight.

Upload / Image Tool

Opens the image upload dialog. You can either upload a new image from your computer or select an existing image from the Content Library. The image is placed on the canvas and can be resized.

Template Tool

Opens the Templates dialog showing a searchable gallery of pre-designed slide templates. Templates are organized by genre (Social Media, Events, Congratulations, Employee Recognition, Promotions). Click a template and then "Import Template" to apply it to your project.

Shapes Tool

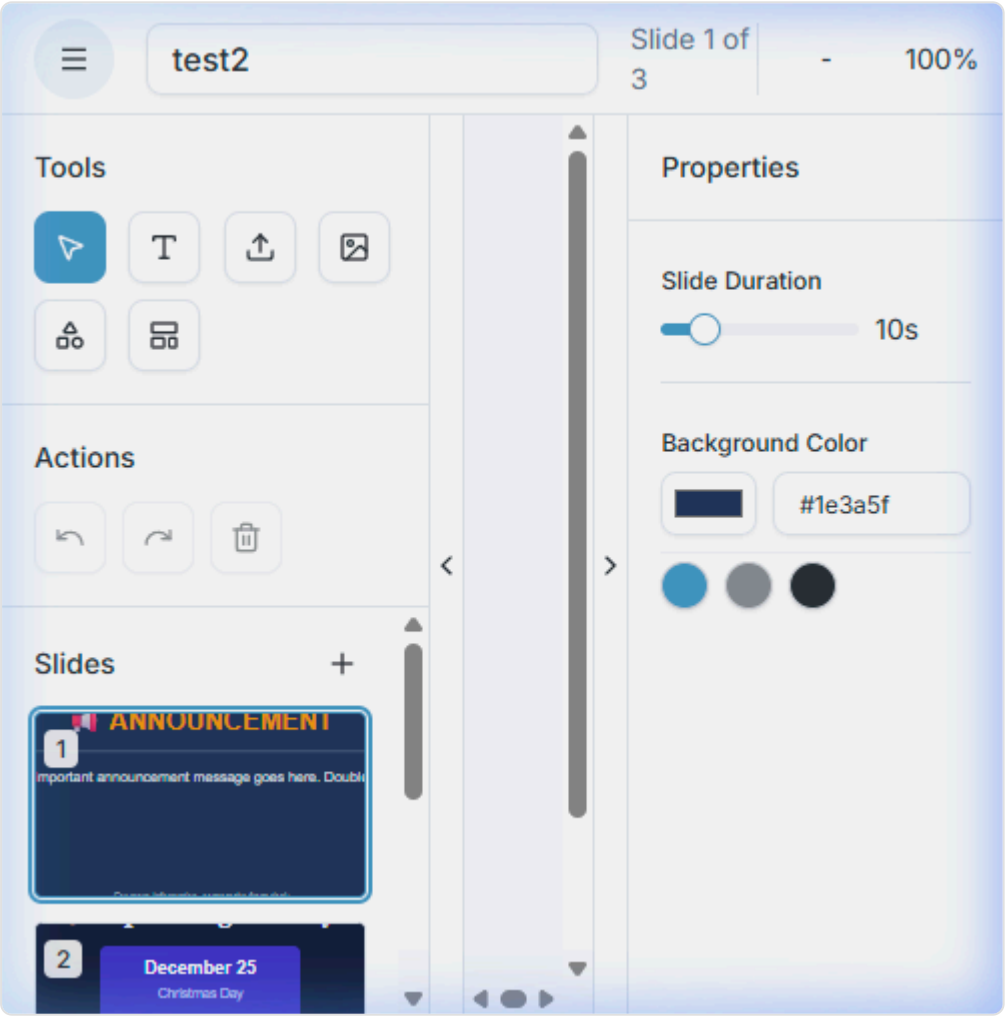
Adds geometric shapes to the canvas. Available shapes include rectangles and circles. Shapes can be resized, repositioned, and styled with custom colors via the Properties panel.

Widget / Layout Tool

Adds pre-built widgets or complex layout grids to your slide. Useful for creating structured content like dashboards or multi-section layouts.

7.2 Actions Panel

Quick-action buttons for common editing operations, located below the toolbar on the left side.



Undo

Reverts the most recent change (moving, resizing, adding, or deleting elements). Keyboard shortcut: **Ctrl+Z**.

Redo

Re-applies a previously undone change. Keyboard shortcut: **Ctrl+Y**.

Delete / Trash

Permanently removes the currently selected element from the canvas. Select an element first, then click this button.

7.3 Slides Panel

Located on the left side, below the Actions. Manages the slide sequence for your project.

Add Slide (+)

Click the + icon next to the "Slides" heading to add a new blank slide to the end of your project.

Slide Thumbnails

Small previews of each slide. Click a thumbnail to navigate to that slide on the canvas.

Duplicate Button

Creates an exact copy of the currently selected slide, including all its elements and styling. Appears below the slide thumbnails.

Duplicate

Delete Slide Button

Permanently removes the currently selected slide from the project. Appears next to the Duplicate button.

Delete

7.4 Top Bar Controls

The horizontal bar across the top of the editor provides project-level controls.

Project Name Field

Displays the current project name. Click to edit and rename your project.

test2

Zoom Out (−)

Decreases the canvas zoom level, allowing you to see more of the slide at a smaller size.

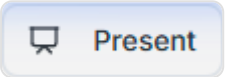
-

Zoom In (+)

Increases the canvas zoom level, allowing you to see fine details of your slide at a larger size.

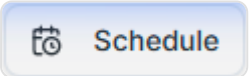
Present Button

Launches a full-screen preview of your presentation. Slides advance automatically based on their configured duration. Press **Escape** to exit the presentation.



Schedule Button

Opens the scheduling dialog where you can set a start time, end time, and recurrence pattern for this project to be displayed on connected screens.



Theme Toggle (☀/🌙)

Switches the editor interface between **Light Mode** and **Dark Mode**. This only affects the editor UI, not the slide content.

Save Button

Manually saves all changes to the current project. The button is highlighted in blue to draw attention. It's recommended to save frequently. Unsaved changes may be lost.

7.5 Properties Panel

Located on the right side of the editor. Displays contextual properties for the currently selected element or the slide itself.

Slide Duration Slider

Controls how long (in seconds) the current slide is displayed during a presentation. Drag the slider or click to adjust. The value is shown on the right side (e.g., "10s").

Background Color Picker

Sets the background color of the current slide. Click the color swatch to open a color picker, or type a hex code directly.

Brand Color Presets

Three quick-select color circles below the color picker for applying your organization's brand colors with a single click:

- **Stratus Blue** — The primary brand color
- **Stratus Gray** — A neutral secondary color
- **Dark Slate** — A dark accent color
